

PWORAUSAN EWE OPPOSUN EPPETIN SEMWEN

Opposun semwenin DTaP (Diphtheria, Tetanus, Pertussis): Met kopwe sinei

Many Vaccine Information Statements are available in Spanish and other languages.

See www.immunize.org/vis

Chómmóngun Pworausen Ekkewe Opposun Eppetin Semwen a pwan wor nónó fósun Speyin me pwan ekkóoch fós. Nengeni/katón www.immunize.org/vis

1 Pwata upwe oppos?

Opposun ewe semwen DTaP a tongeni eppeti noumw semiriit sen ei semwen diphtheria, tetanus, me pertussis.

- **Ei semwen DIPHTHERIA (D)** a tongeni afisata osukosuken ngasangas, penóón inis, me apwangapwangenon ngasangas. Mwen ekkei opposun semwen, ei semwen diphtheria a nii engon ngoroun semiriit iteitan ier non Merika (United States).
- **Ei semwen TETANUS (T)** a afisata metek me ngutunón futukach. Mei tongeni afisatá “kéénón” ngáchich pwun epwene weires omw kopwe amasaw ika oromi mettóóch. Ina epwe 1 aramas me nein 5 ekkei a toriir semwenin tetanus mei manó.
- **Ei semwenin PERTUSSIS (aP)**, a pwan iteni Whooping Cough (och tapin moor), a afisata moor mei wessen aweires a kon aweires ngeni monukon me semiriit ar repwe mongo, ún, ika ngasangas. Mei pwan tongeni afisata semwenin pneumonia, máán kawakaw, feiengawan non tupwu, ika manó.

Napengeni semiriit ra oppos ewe opposun semwenin DTaP repwe eppet non unusen ar nomw non tikan semiriit. Chómmóng me nein semiriit epwe tongeni toriir ei semwen ika sia kounó ne angei ekkei oppos.

2 Opposun Semwenin DTaP

Semiriit repwe angei ina epwe 5 fochun ei opposun semwenin DTaP, efoch non ew ekkei ier:

- 2 maram
- 4 maram
- 6 maram
- 15-18 maram
- 4-6 ier

Ewe opposun semwenin DTaP ka tongeni angei fengenii me pwan ekkóoch opposun semwen. Pwan fan ekkóoch emon semiriit a tongeni angei DTaP fengen me ekkóoch opposun semwen non effoch chok oppos.

3

Ekkóoch semiriit resapw angei ewe opposun ewe semwen DTaP ika repwe uti

DTaP a ngeni chok semiriit ierir a kukun seni 7 ier. Ewe opposun semwenin DTaP ese ochungeni meinisin—ekkóoch semiriit repwe angei ekkóoch opposun semwen mei sókonó ewe epwe chok wor diphtheria me tetanus nge esapw DTaP.

Ereni noumw we chon aninnisin safei ika pwe noumw we semiriit:

- A piin tori **semwen mwirin an angei efoch opposun semwenin DTaP**, ika tori ese nifinifin **semwenin allergies mi aweires me epwe fen máánó ren**.
- A piin tori **coma (en ekan usun chok a máánó) ika fen echichin chok an tori man kawakaw non 7 rààn mwirin ewe efoch opposun semwenin DTaP**.
- Mei tori **man kawakaw ika pwan ekkóoch sokkun osukosukan waan non inis**.
- Mei piin tori ew semwen a iteni **Guillain-Barré Syndrome (GBS)**.
- A piin tori **watten metek ika pwo mwirin ewe efoch oppos mei angei opposun semwenin DTaP ika DT**.

Non ekkóoch fansoun, noumw we chon aninnisin safei epwe finata pwe epwe amwetta an noumw we opposun ewe semwenin DTaP ngeni pwan mwirin ika ka pwan chuto.

Semiriit mi chok kukkun ar semwen, ren má tter, ra tongeni oppos. Semiriit mei ekis watt ar semwen repwe uti tori ar chikar mwen ar repwe angei ewe opposun ewe semwenin DTaP.

Noumw we chon aninnisin safei a tongeni pwan ngonuk ekkóoch pworaus.
